65		Beaver-lodge 6808	Very early maturing varieties. Plants are so loaded with tomatoes that there seems to be Extremely compact, determinate plants tend to creep rather than grow tall and would be perfect in a hanging basket or patio container. Flavor is rich and balanced. Bred at the Beaverlodge Research Center in Alberta, Canada	Determinate 55 days 1.5 inch OP	Territorial
66		Crimson Sprinter	Brilliant candy apple red fruit and strong performance in cool conditions. Fruits are early, abundant and ripen well on the vine. The earliest cultivar to carry the famous crimson gene for high lycopene. Holds well due to its thick skin.	Indet 65 days 5-7 oz OP Early Season	Restoration Seeds
67		Early Girl	Bears lots of fruit for early harvest, and continues producing through summer. Many gardeners plant it again late in the summer so that it will produce a huge fresh crop of "fall tomatoes" quickly before frost.	Indet 50 days 6-8 oz Hybrid (F1)	Ferry-Morse
68		Early Wonder	Extra-early maturing and compact variety that yields an abundant crop of round, dark-pink, great-tasting fruit. Perfect for gardeners in shorter season growing climates. A very good choice for container gardening.	Determinate 54 Days 6 oz OP Very Early	Tomato Fest

<h1>69</h1>		<p>Fourth of July</p>	<p>The fruit's main attractions are its early arrival, its dependability, disease resistance, and the sheer volume of fruit it produces. Even for an early tomato, critics agree it has a better-than-average taste. The only drawbacks mentioned regularly about this tomato are thicker-than-normal skin and occasional cracking</p>	<p>Indet 49 days 1.5 inches Hybrid</p>	<p>Burpee</p>
<h1>70</h1>		<p>June Pink</p>	<p>Yields clusters of 4-6 beautiful, uniformly round, rose-pink tomatoes. Wonderful sweet/tart flavors. Produces well until frost and appears to have good disease resistance. A good, prolific tomato for both hot and cooler growing regions</p>	<p>Indet 68 days 4-5 oz OP Early Season</p>	<p>Tomato Fest</p>
<h1>71</h1>		<p>Kimberly</p>	<p>Produces 6', indeterminate, potato-leaf tomato plants. Yields golf ball-sized tomatoes. Surprisingly good flavor for such an early tomato. Sets well in warmer growing regions and produces well into autumn. Great tomato for patio or container garden.</p>	<p>Indet 68 days 1 - 1½ in OP Early Season</p>	<p>Tomato Fest</p>
<h1>72</h1>		<p>Oregon Spring</p>	<p>Oregon Spring will produce incredibly early yields of oval tomatoes when planted outside a month before your last frost date and given no protection except on frosty nights.</p>	<p>Determinate 65-70 days 3-5 oz OP Early Season</p>	<p>Territorial Seed</p>

<h1>73</h1>		<p>Siletz</p>	<p>One of the most reliable slicing tomatoes you can grow. Comes in just ahead of Oregon Spring. The flavor-packed red tomatoes are nearly seedless. Expect several bursts of ripe tomatoes as the season progresses.</p>	<p>Determinate 70 days 4 in OP Early Season</p>	<p>Territorial Seed</p>
<h1>74</h1>		<p>Stupice</p>	<p>This cold-tolerant, potato leaf tomato ripens to sweet, red, slightly oval, 2 inch fruit. Stupice consistently gets high marks for taste throughout the summer. Pumps out fruit over the entire season.</p>	<p>Indet 60-65 days 2 in OP Early</p>	<p>Territorial</p>
